Confined Space Rescue Plan

Ensure that all of the following are met prior to starting any confined space entry job tasks.

The attached Rescue Plan and the following Procedures are part of the written plan and are based on the assessment of hazards in this space.

Prior to entry and/or work in the confined space:
1. The entry supervisor will ensure that the attached “rescue plan” has been completed and that all rescue equipment identified in the plan is available to conduct a rescue in the confined space.
2. The entry supervisor will ensure that an adequate number of appropriately trained persons are available for immediate implementation of the rescue procedures that apply to the confined space.
3. Inspect all rescue equipment and assure all equipment is within operational requirements.
4. The entry supervisor will review all emergency procedures, including procedures relating to emergencies outside the confined space, with all employees involved; and assure that everyone has a clear understanding of their role.
5. Team members shall stage equipment where needed and assure incidental damage does not occur.
6. The attendant shall establish communication with all workers, using the means described in the rescue plan.
7. Team members shall ensure that Confined Space Entry signs are placed on the barricades of the actual spaces being entered.

Upon entry and while working in the confined space:
1. The attendant shall maintain visual on entrant and remain in constant communication with all workers inside the confined space (i.e. hand signals/gestures)
   a. In special cases such as baffle walls, a secondary entrant shall be placed to observe primary and relay signals.
2. The attendant must be notified and the entrant must exit immediately if anyone recognizes:
   - Unusual actions/behaviors
   - Unexpected hazard(s)
   - Unsafe acts or; detects a condition prohibited by the permit
3. Entrants must also exit the confined space as quickly as possible, when:
   - An order to evacuate is given by the attendant or entry supervisor
   - The entrant recognizes a sign or symptom of over-exposure
   - An evacuation alarm is activated.

In the event of a confined space rescue:
1. The attendant does not enter the confined space but immediately notifies rescue team and entry supervisor, using the means of communication described in the attached rescue plan.
   a. Entry Supervisor shall initiate 911 procedures and notify boat personnel and Corporate Hotline.
